

SERVICE COMMUNICATIONS INC.
Voice • Data • Security • Cabling

Healthcare

The Challenge A large healthcare provider located in the Portland and Vancouver areas has consistently grown year after year. New hospital and clinic openings required responsive move, add, change cabling and voice services without disrupting a 24/7 operation.

The Solution For the last 15 years, Service Communications Inc. (SCI) has provided cabling and voice services to our healthcare client. With each new building, SCI manages the infrastructure requirements and standards necessary to ensure a smooth and timely launch. Given the knowledge of the customer and their needs, SCI is extremely proactive and requires minimal supervision and direction.

The Results SCI was recently asked to reconfigure hospital management office space. Senior management got a first-hand look at the level of expertise and service provided by SCI. Needless to say, both IT and upper management have a high level of trust and satisfaction in the work that SCI provides on an ongoing basis.

Testimonial “After 15 years of service, our commitment and responsiveness is unwavering; we have a trusted partnership – a true win-win.”
- Bill Kraig, Account Manager, Service Communications, Inc.

About SCI

Service Communications Inc. provides installs and supports voice, data, security and cabling systems. SCI's 20 year expertise offers the single source solution that has successfully integrated the network infrastructure needs for the retail, financial, healthcare, education and government sectors, among others.
